

Power up with Rogers Electric

ENERGY SOLUTIONS

Smaller, brighter and more efficient, Rogers Electric delivers upgrades and retrofits to any lighting system nationally.

ON DEMAND SERVICES

Rogers Electric delivers on-demand lighting service — 24 hours a day, 7 days a week, 365 days a year. Our fully stocked service vehicles and highly trained technicians are ready to respond quickly and resolve most issues on the first visit, minimizing downtime and keeping facilities well-lit and fully operational.

PREVENTATIVE MAINTENANCE

Rogers Electric provides comprehensive Planned Lighting Maintenance Programs for thousands of retail, commercial, and industrial sites across the country. Backed by a national network of trained technicians, specialized equipment, and decades of experience, we ensure your lighting systems stay efficient, compliant, and fully operational — coast to coast.

TURNKEY RELAMP/RETROFIT SOLUTIONS

Rogers Electric offers a full team of in-house project managers and lighting technicians ready to handle relamps and retrofits for lighting systems of any size or complexity. As a self-performing provider, we deliver consistent, reliable service — ensuring quality control, accountability, and efficiency from start to finish.

ENERGY AUDITS & REBATE SUPPORT

Rogers Electric helps businesses identify energy waste and optimize performance through comprehensive energy audits. Our experts assess where energy is being lost and which systems are underperforming, then deliver a customized action plan to enhance comfort, reduce costs, and improve overall energy efficiency.
